

Assignment 1.1 Create an XML

Exercise 1.1

Create an XML file that stores data for a library.

The library has two catalogues (technical books, and for cookery books).

Each catalogue can contain a number of books (say 2 for the purpose of this exercise) .

Books will have an ISBN, title and author.

Upload you .xml file to here, and to a github repository called dataRepresentation

I will look for a link to this repository at the end of the course.

A sample solution will be posted in two weeks

Submission status

This assignment will accept submissions from **Tuesday, 29 September 2020, 8:14 PM**

Attempt number	This is attempt 1.	
Submission status	No attempt	
Grading status	Not graded	
Due date	Monday, 12 October 2020, 8:14 PM	^
Time remaining	19 days 3 hours
